Markus Fuerst

Personal priorities

Analysis, development and implementation of organizational structures and process layouts for companies / departments / business units; supporting start-ups and / or set-up periods; change management; team building

Working field: renewable energies with emphasis on biogas / biomass and regional planning / land-use planning, preferably working in an international context

Project management and superordinate project steering, team management and team coordination

Pursuing sustainable, ecological and interdisciplinary approaches and strategies

Practicing a cooperative, situational, team- and goal-oriented leadership style

Proactive approach – analytic evaluation – hands-on mentality – creative solutions – mindful communication – thoughtful and strategic decision-making

Markus Fuerst

„If we did all the things we are capable of, we would literally astound ourselves.“

Thomas Alva Edison

I master challenges in a creative way: taking “a broader view”, I develop realistic – sometimes unusual – solutions “out-of-the-box”; independently, as part of a team - yet always taking full responsibility.

Attentively and with an eye for the essentials, I successfully reach the goals set – using clear communication, proactive coordination, and delegating if necessary.

Interdisciplinary knowledge, in-depth expertise and years of work and life experience – this is my passionate contribution as a generalist to the development and implementation of environmentally and economically sound and sustainable projects.

Credo and objectives
